

ACTIVE INSIGHTS: M365 HEALTH CHECK

See your Microsoft 365 world in a new light

Easy onboarding with short-term, read-only access.

Identify potential cost savings and productivity improvements.

Full, custom report provided following the Health Check period

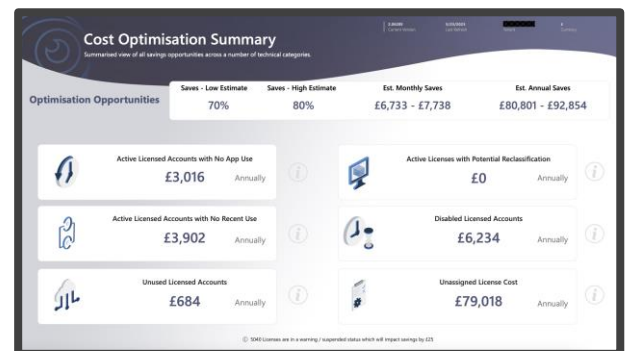

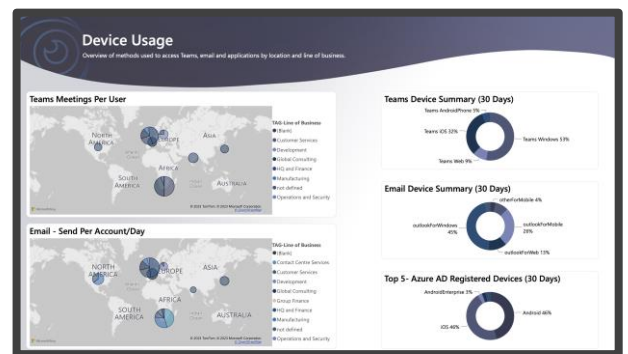

The Microsoft 365 Health Check is the first step to optimising, securing, and controlling your Microsoft investment.

Powered by Active Insight’s powerful analytical capabilities, the Microsoft 365 Health Check is a discreet optimisation analysis of the Microsoft 365 environment, surfacing opportunities to optimise costs, resources, and Microsoft functionality. The end result is a summarised snapshot of potential savings opportunities - totalling an average of 17-37% - across a number of technical categories.

The Microsoft 365 Health Check is free to run, requires read-only access, and is a secure means of uprooting hidden opportunities to right-size, optimise, and enhance Microsoft 365 resource usage.

To maximise the value on offer, the Microsoft 365 Health Check report contains both summary and deep-reaching insights - starting with a brief overview of findings and recommendations.

The report then dives below the surface to explore the cost, usage, wastage, and optimisation opportunities across highly relevant areas of Microsoft 365 - including JML processes, finance optimisation, adoption and consumption of features, AD account distribution, and much more.
